Professional Summary

Software Engineer with experience in backend, web development, cloud infrastructure, and technical leadership. Developed enterprise integration APIs (Azure AD, Dynamics 365), academic platforms on PostgreSQL/Supabase for 600+ users, and Chrome and Revit extensions with Python and JavaScript.

Experience

- Santillana**, Backend Developer - Contract

- Developed a Python API with Azure AD and Dynamics 365 to sync inventory between branches in Venezuela and Spain, eliminating manual international stock reconciliation.
 - Integrated 9 endpoints and OAuth to unify order data in a centralized endpoint, enabling the client to digitize and track cross-branch operations for the first time.

Remote
Apr 2026 – May 2026
2 months
- Universidad Santa María (USM)**, Backend Developer - Contract

- Designed a PostgreSQL/Supabase backend with 32 tables and 7 roles, replacing a paper-based system for ~600 students and ~30 administrative staff across 2 campuses.
 - Modeled the database schema and workflow automations that eliminated the manual submission, review, and tracking workflow for projects between students and staff.
 - Managed Supabase cloud infrastructure optimizing costs to maintain cost-efficiency, and coordinated technical alignment with executive administration while reporting progress to university leadership.

Caracas, Venezuela
Dec 2025 – present
6 months
- VRA**, Technical Lead & Developer - Contract

- Led a team of 8 developers delivering a Revit extension (PyRevit) for quantity takeoffs and cost estimation under COVENIN standards, coordinating weekly sprints and completing the project in 3 months within the planned deadline.
 - Implemented the core calculation engine in Python/PyRevit with COVENIN report generation by material, blueprint, or full project, with Excel and PDF export for academic and professional use.

Caracas, Venezuela
May 2024 – Aug 2024
4 months

Projects

- MiCupo**

- Created a Chrome extension (JavaScript, Manifest V3) that monitors real-time course availability on Terna and automatically selects released slots, eliminating days of manual checking and fully automating the course registration process.

Jan 2024 – Oct 2024

Skills

Backend: Python, Node.js, SQL, PostgreSQL, Supabase, REST API, CRUD, OAuth, Azure AD, Dynamics 365
Frontend: JavaScript, React, HTML, CSS
Tools: ClaudeCode, LangChain, Git, Bash, Linux, Revit Extensions, Chrome Extensions, Opencode, NixOS
Languages: Spanish (Native), English C1 (EF SET)

Education

- B.S. Universidad Santa María (USM)**, Systems Engineering

- Curriculum focused on software engineering, database and systems design.

Caracas, Venezuela
2022 – 2027
